

WHY PVA?

- ✓ Water Absorbency
- ✓ Mud and Dirt Killer
- ✓ Soft and Smooth Texture
- ✓ Easy-to-Use
- ✓ Reusability

WATER ABSORBENCY

It is no secret that all Polyvinyl Alcohol products are dedicated to this specific task. PVA Chamois is no other than others with anomalous water absorbing ability. This product with its well-designed size is able to immediately absorb any water stain over car surface effectively.

MUD AND DIRT KILLER

One of the more underrated features of PVA Chamois is its cleaning ability when it comes to general dirt and grime. The texture of PVA Chamois tends to stick to the surface stronger than other average cotton or fiber-made products, which leads to easier wiping off the mud!

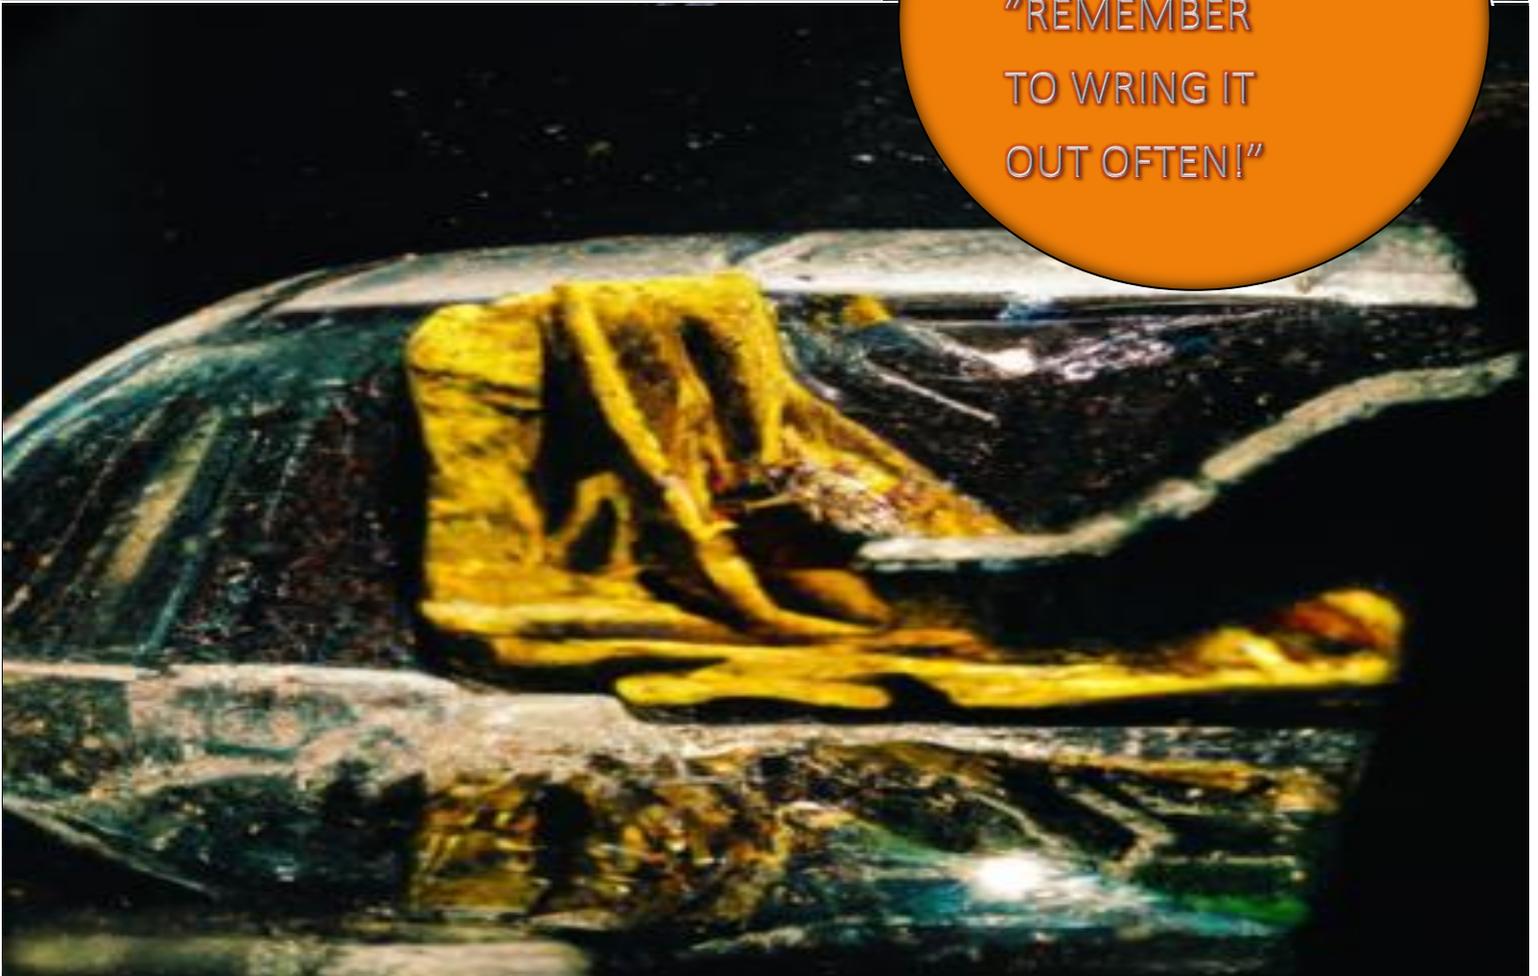

SOFT AND SMOOTH TEXTURE

When it is ready to be used after soaking in water, the texture of PVA material becomes squishy and mellow. This state is evidently scratch-free, working flawlessly on all kinds of exterior or interior surface on your cars.

"REMEMBER
TO WRING IT
OUT OFTEN!"

EASY-TO-USE

PVA Chamois is effortless to carry around everywhere and quick to be put on duty when it is needed. It is safe to use and quick to learn for all age groups. On the other note, it also drips less and dries faster than others, making it more efficient to clean large objects like cars.

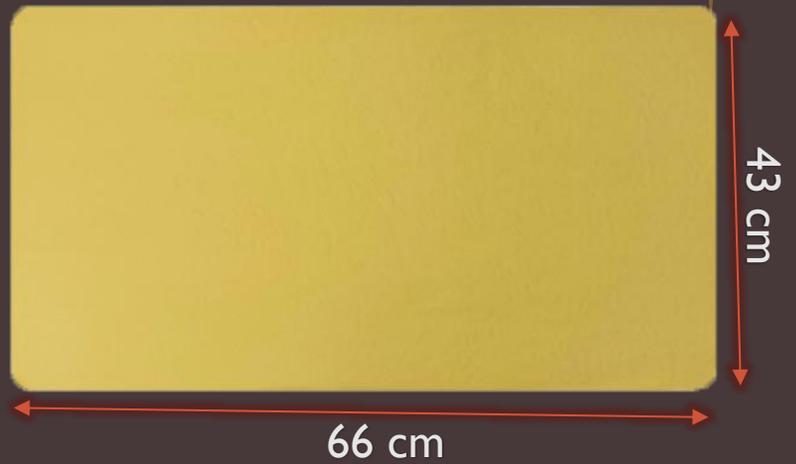

REUSABILITY

Comparing to peers made from other materials, Polyvinyl Alcohol products have longer lifespan due to its germ resistance. The concrete state provides natural shelter to withstand mold, mildew and bacteria. Combining its quick drying ability, it should be able to be stored well in the cars or anywhere else.

TIMELESS DESIGNS

I.	MATERIAL	Polyvinyl Alcohol
II.	COLOR	Light Yellow (Customizable)

REPUTED COMPANY

Established in 2001, sited in Ninghai, near Ningbo, famous seaport in eastern China, GOLDTIME is one of the very first and leading expert manufacturers of PVA cleaning sponge and towels in China. Our factory has more than 30000 square meters workshops with advanced manufacturing equipment and leaping technical strength.

With the features of super softness, excellent durability, hyper absorption capacity and high chemical resistance, our PVA chamois, magic towels, sponge blocks, water rollers are widely used for the cleaning and drying of automobile, glass, furniture, dishes, floor, kitchen appliance, precision instrument and workshop. Moreover, cooling towel, sports towel, PVA puffs, bath sponges and facial towels are also popular for personal care. We can offer various types of related products with flexibility on texture, color, size, shape and quantity.

Since 2001, we have exported all of our products abroad to many countries all over the world. Meanwhile, we would like to develop worldwide business relationships, our whole principle and work ethic are exclusively dedicated to providing high quality products and service for the wellbeing and needs of all in the world! We welcome you to inquire about our products.

Still hesitating?

Time has proven us worthy to be in your consideration. We have passed the trial of time and lasted over two decades in this industrial. As one, we offer you not only products of high quality but also the golden seed of time which has been imbued of our fervor and endeavor to serve.

FAQ

Q: *What about we use the PVA cloth when it's dry and hard, given that it doesn't scratch?*

A: The PVA cloth is only intended for use when it's wet. When it's dry, it's stiff and will not be effective. Although it should be concerned that it may cause minor scratching when it's solid hard, once it's moistened, it becomes very soft and won't hurt a soul.

Q: *Should we worry about the PH of the chemical (PVA) in the cloth when cleaning others such as natural stone made surface?*

A: It is perfectly safe to use, since it does not release any chemicals while cleaning or drying with anything.

Q: *Can it be used for drying salt water?*

A: Absolutely!

Q: *I prefer to use PVA cloths instead of paper towels for cleaning and wiping up spills. However, I am concerned about how much bacteria sponges can harbor and if PVA cloths are the same. How does the germ-hosting of PVA cloths compare to other materials? Do they need to be thrown away after a week of use, even though they are more durable than other cleaning products?*

A: The PVA cloth doesn't grow bacteria, mold, and mildew like regular cleaning cloths and sponges do. Although they eventually need to be replaced when it gets too grimy, they are washable and last much longer than traditional cleaning products.

Q: *Can I put it in a washing machine with a specific type of detergent?*

A: Yes! Any type of detergent is perfectly fine! However, you should avoid using extreme high temperature water that is over 60 °C/ 140 °F.

Q: *I like to work out often. Can I should it to dry my sweat?*

A: Sure! It is designed this way! Nonetheless, it's better to avoid drying excess amount of sweat without washing it. Due to its super absorbent attribute, it can be smelly without proper tending. Thus, itself should be washed and wrung regularly.
